LEED QUALIFICATIONS

MEDIUM AND LIGHTWEIGHT (EZ-107) CMU

All of the CMU manufactured by Harvey Cement Products (Medium Weight CMU and “E Z 107” Lightweight CMU) qualify for a combined **4 LEED points**:

The following sections briefly describe how Harvey Cement Products concrete masonry units and cast stone units can contribute to earning LEED points.

Materials and Resources Credit – Recycled Content Credit 4.2

Increase demand for building products that incorporate recycled content materials, therefore reducing impacts resulting from extraction and processing of new virgin materials.

Materials and Resources Credit – Regional Materials Credit 5.2

Using materials and products that are extracted and manufactured within the region support the use of indigenous resources and thereby reduce environmental impacts of transportation.

2 PTS. Regional Materials Section 5.2:

20 % Manufactured Regionally

2 PTS. Recycled Content Section 4.2:

20 % (Post-Consumer ½ Post-Industrial)

Embryotoxicity:	Based on available data, the classification criteria are not met.
Fertility:	Based on available data, the classification criteria are not met.
STOT-Repeated Exposure:	Causes damage to lungs through prolonged or repeated exposure. Respirable crystalline silica in the form of quartz or cristobalite from occupational sources is listed in the International Agency for Research on Cancer (IARC) and National Toxicity Program (NTP) as a lung carcinogen. Prolonged exposure to respirable crystalline silica has been known to cause silicosis, a lung disease, which may be disabling. While there may be a factor of individual susceptibility to a given exposure to respirable silica dust, the risk of contracting silicosis and the severity of the disease is clearly related to the amount of dust exposure and the length of time (usually years) of exposure.
Aspiration Hazard:	Based on the available data, the classification criteria are not met.
Toxic Synergistic Materials:	Not available.
Other Information:	Not available.

Section 12: ECOLOGICAL INFORMATION

12.1 ECOTOXICITY

Acute/Chronic Toxicity: No ecological consideration when used according to directions.

12.2 PERSISTENCE AND DEGRADABILITY

Not available.

12.3 BIOACCUMULATIVE POTENTIAL

Bioaccumulation: Not available.

12.4 MOBILITY IN SOIL

Not available.

ENVIRONMENTAL EFFECT ON AQUATIC HABITAT:

Uncured cementitious materials or finely divided (crushed) concrete material is an environmental hazard, which may adversely affect fish and other wildlife. Do not use crushed concrete as fill near any aquatic habitat. Discharge of large quantities to any waterways would be expected to cause significant consequence on aquatic habitat.
